

Supported Factories & Businesses Framework RM722 ICT Disposal Services - Secure & Non Secure

Engaging intelligently for end-of-use ICT - Secure and Non Secure data handled to Government standards, ensuring peace of mind and sustainable cost effective disposal - Remploy is a wise investment.

Secure ICT Recycling & Disposal

Remploy e-cycle helps organisations in the United Kingdom to recycle computers and electronic waste, meeting all their IT and communications (ICT) equipment recycling needs

We manage your enterprise level IT disposal, providing ISO standards and WEEE compliance for the most secure data cleansing and environmental responsibility.

Our national ICT asset management service provides absolute file security and peace of mind for UK organisations needing to recycle old computers or used ICT equipment (including mobile phones, batteries, monitors, printers and PDAs).

We guarantee data security and destruction during the recycling process, enabling the safe re-sale of your end-of-use equipment adhere to the highest of international standards (including ISO 14001 and ISO 9001). You can be assured that we will eliminate any risk of data loss, therefore avoiding potentially costly fines or damage to your organisational reputation. Our data destruction standards, which are backed by a financial guarantee, are amongst the world's highest.

Using BLANCCO software (with CESG Level 5 security), our system has been approved for UK Government data cleansing (and even exceeds all standards set by the US Federal Government).

This software ensures data security through a comprehensive data purge process. Our 'belt and braces' approach to secure data protection means that in addition to our 'best-in-class' software we insist on providing comprehensive asset tracking. You will always know exactly where your equipment is at any stage of the refurbishment process.

IT Recycling for Local Government

Remploy is proud to refurbish, donate or recycle old computers obtained from over 20 public sector bodies

It is our experience with the following organisations that drives our understanding of your local government needs:

- Birmingham City Council
- Trafford Metropolitan Council
- Chester City Council
- Chesterfield Borough Council
- Daventry District Council
- Denbighshire County Council
- Derbyshire County Council
- Derby City Council
- Fife Council
- Kent County Council
- Kirklees Metropolitan Council
- Merseyside Police
- Metropolitan Police
- Nottinghamshire County Council
- Oxfordshire County Council
- Shropshire Fire and Rescue Service
- Trafford Metropolitan Council
- Value Wales
- Welsh Assembly
- Welsh Development Agency

Turn Redundant Assets into Revenue Streams

The requirement to 'turn ICT assets' and keep pace with new technologies often means there is an imperative to make additional revenue from end-of-use ICT equipment.

Remploy e-cycle is experienced in remarketing ICT hardware and can deliver significant re-sale revenues on your end-of-use, ICT estate (where age and specification permit.)

We always carry out a full audit of equipment to help understand your needs, identify WEEE or Data Protection concerns and offer the best advice. This advice will include information on the potential reusability of your assets and how to maximise any profit on their re-sale.

Through our skilled use of online and offline remarketing and resale opportunities and through our strategic partnerships, we are able to achieve significant remarketing revenues on behalf of our clients.

Potentially, the costs incurred during processing can be offset with the residual value we recover from IT equipment that is remarketed and resold - effectively generating an additional revenue stream that you could use to help fund the purchase of new equipment.

Compliant IT Recycling & Disposal

Our 'one-stop shop' service gives customers increased value, along with greater peace of mind, through an integrated, start-to-finish computer recycling and disposal operation.

We can take a great weight off your shoulders by ensuring that the disposal of any WEEE or IT equipment not redeployed or remarketed, is carried out in accordance with current legislation.

Once we have made your equipment secure, one of our partner organisations across the UK will dispose of it in line with WEEE obligations.

Non Secure ICT Recycling & Disposal

The requirement to 'turn ICT assets' and keep pace with new technologies often means there is an imperative to make additional revenue from end-of-use ICT equipment.

As with secure ICT recycling, we can take a weight off your shoulders by ensuring that the disposal of any WEEE or IT equipment not redeployed or remarketed, is carried out in accordance with current legislation.

Remploy makes a sustainable difference in the lives of disabled people by providing employment, learning and personal growth opportunities.

For those companies who wish to make a positive contribution through corporate social responsibility (CSR), there is no better way of 'giving back' than to donate to charity through environmental IT recycling, all the while providing employment for disabled people.
